DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1,3-7,11-15 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 12 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The specification does not define what is meant by this term. Does it include signal/carrier waves. The Examiner takes the broadest reasonable interpretation to include signal waves as a possible. The Applicant is recommended to amend the claim to say "non-transitory" to exclude carrier waves. See Memo on "Subject Matter Eligibility on Computer Readable media" of 1/26/2010.

Claims 1 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim recites a processor, but the processor could be an application "processor", which is exclusively a software implementation. The Examiner recommends a "microprocessor" be recited to overcome this rejection.

Claim 11 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The apparatus recited can be software alone, and therefore non-statutory see Page 6 Par. 1.

Allowable Subject Matter

Claims 1, 3-7, 11-15 are allowed.

The Applicant's argument regarding the spreading the signature across more than one block and further the flat area being unchanged.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
